1.0 INSTALLATION OVERVIEW

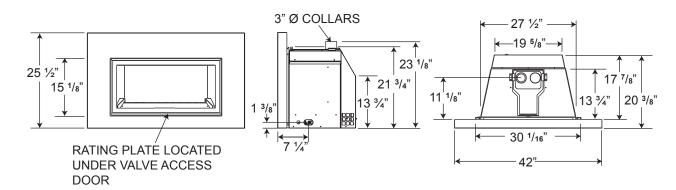

2.0 INTRODUCTION

WARNING

- THIS APPLIANCE IS HOT WHEN OPERATED AND CAN CAUSE SEVERE BURNS IF CONTACTED.
- Do not operate appliance before reading and understanding operating instructions. Failure to operate appliance according to operating instructions could cause fire or injury.
- Risk of fire or asphyxiation do not operate appliance with fixed glass removed.
- Do not connect 110 volts to the control valve.
- Risk of burns. The appliance should be turned off and cooled before servicing.
- Do not install damaged, incomplete or substitute components.
- Risk of cuts and abrasions. Wear protective gloves and safety glasses during installation. Sheet metal edges may be sharp.
- Do not burn wood or other materials in this appliance.
- Young children should be carefully supervised when they are in the same room as the appliance. Toddlers, young children and others may be susceptible to accidental contact burns. A physical barrier is recommended if there are at risk individuals in the house. To restrict access to an appliance or stove, install an adjustable safety gate to keep toddlers, young children and other at risk individuals out of the room and away from hot surfaces.
- Clothing or other flammable material should not be placed on or near the appliance.
- Due to high temperatures, the appliance should be located out of traffic and away from furniture and draperies.
- Ensure you have incorporated adequate safety measure to protect infants/toddlers from touching hot surfaces.
- Even after the appliance is out, the glass and/or screen will remain hot for an extended period of time.
- Check with your local hearth specialty dealer for safety screens and hearth guards to protect children from hot surfaces. These screens and guards must be fastened to the floor.
- Any safety screen or guard removed for servicing must be replaced prior to operating the appliance.
- It is imperative that the control compartments, burners and circulating blower and its passageway in the
 appliance and venting system are kept clean. The appliance and its venting system should be inspected
 before use and at least annually by a qualified service person. More frequent cleaning may be required
 due to excessive lint from carpeting, bedding material, etc. The appliance area must be kept clear and
 free from combustible materials, gasoline and other flammable vapors and liquids.
- Under no circumstances should this appliance be modified.
- This appliance must not be connected to a chimney flue pipe serving a separate solid fuel burning appliance.
- Do not use this appliance if any part has been under water. Immediately call a qualified service technician to inspect the appliance and to replace any part of the control system and any gas control which has been under water.
- Do not operate the appliance with the glass door removed, cracked or broken. Replacement of the glass should be done by a licensed or qualified service person.
- Do not strike or slam shut the appliance glass door.
- When equipped with pressure relief doors, they must be kept closed while the appliance is operating to prevent exhaust fumes containing carbon monoxide, from entering into the home. Temperatures of the exhaust escaping through these openings can also cause the surrounding combustible materials to overheat and catch fire.
- Only doors / optional fronts certified with the unit are to be installed on the appliance.
- Keep the packaging material out of reach of children and dispose of the material in a safe manner. As with all plastic bags, these are not toys and should be kept away from children and infants.
- As with any combustion appliance, we recommend having your appliance regularly inspected and serviced as well as having a Carbon Monoxide Detector installed in the same area to defend you and your family against Carbon Monoxide.

W415-0832 / 09.18.09

2.1 **DIMENSIONS**

2.2 GENERAL INSTRUCTIONS

ALWAYS LIGHT THE PILOT WHETHER FOR THE FIRST TIME OR IF THE GAS SUPPLY HAS RAN OUT, WITH THE GLASS DOOR OPENED OR REMOVED.

PROVIDE ADEQUATE CLEARANCE FOR SERVICING AND OPERATING THE APPLIANCE.

PROVIDE ADEQUATE VENTILATION.

NEVER OBSTRUCT THE FRONT OPENING OF THE APPLIANCE.

OBJECTS PLACED IN FRONT OF THE APPLIANCE MUST BE KEPT A MINIMUM OF 48" FROM THE FRONT FACE OF THE UNIT.

FIRE RISK. EXPLOSION HAZARD.

HIGH PRESSURE WILL DAMAGE VALVE. DISCONNECT GAS SUPPLY PIPING BEFORE PRESSURE TESTING GAS LINE AT TEST PRESSURES ABOVE 1/2 PSIG. CLOSE THE MANUAL SHUT-OFF VALVE BEFORE PRESSURE TESTING GAS LINE AT TEST PRESSURES EQUAL TO OR LESS THAN 1/2 PSIG.

USE ONLY WOLF STEEL APPROVED OPTIONAL ACCESSORIES AND REPLACEMENT PARTS WITH THIS APPLIANCE. USING NON-LISTED ACCESSORIES (BLOWERS, DOORS, LOUVRES, TRIMS, GAS COMPONENTS, VENTING COMPONENTS, ETC.) COULD RESULT IN A SAFETY HAZARD AND WILL VOID THE WARRANTY AND CERTIFICATION.

THIS GAS APPLIANCE SHOULD BE INSTALLED AND SERVICED BY A QUALIFIED INSTALLER to conform with local codes. Installation practices vary from region to region and it is important to know the specifics that apply to your area, for example in Massachusetts State:

- This product must be installed by a licensed plumber or gas fitter when installed within the commonwealth of Massachusetts.
- The appliance damper must be removed or welded in the open position prior to installation of a appliance insert or gas log.
- The appliance off valve must be a "T" handle gas cock.
- The flexible connector must not be longer than 36 inches.
- A Carbon Monoxide detector is required in all rooms containing gas fired appliances.
- The appliance is not approved for installation in a bedroom or bathroom unless the unit is a direct vent sealed combustion product.

The installation must conform with local codes or, in absence of local codes, the National Gas and Propane Installation Code CSA B149.1 in Canada, or the National Fuel Gas Code, ANSI Z223.1 / NFPA 54 in the United States. Suitable for mobile home installation if installed in accordance with the current standard CAN/CSA Z240MH Series, for gas equipped mobile homes, in Canada or ANSI Z223.1 and NFPA 54 in the United States.

We suggest that our gas hearth products be installed and serviced by professionals who are certified in the U.S. by the National Appliance Institute[®] (NFI) as NFI Gas Specialists

As long as the required clearance to combustibles is

maintained, the most desirable and beneficial location for an appliance is in the center of a building, thereby allowing the most efficient use of the heat created. The location of windows, doors and the traffic flow in the room where the appliance is to be located should be considered. If possible, you should choose a location where the vent will pass through the house without cutting a floor or roof joist.

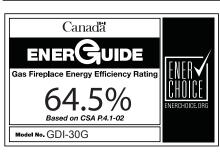

2.3 GENERAL INFORMATION

FOR YOUR SATISFACTION, THIS APPLIANCE HAS BEEN TEST-FIRED TO ASSURE ITS OPERATION AND QUALITY!

GDI-30G											
	NG	LP									
Altitude (FT)	0-4,500	0-4500									
Max. Input (BTU/HR)	24,500	24,500									
Max. Output (BTU/HR)	20,825	20,825									
Efficiency (w/the fan on)	85%	85%									
A.F.U.E.	82%	82%									
Min. Inlet Gas Supply Pressure	4.5" Water Column	11" Water Column									
Max. Inlet Gas Supply Pressure	7" Water Column	13" Water Column									
Manifold Pressure (Under Flow Conditions)	3.5" Water Column	10" Water Column									

When the appliance is installed at elevations above 4,500ft, and in the absence of specific recommendations from the local authority having jurisdiction, the certified high altitude input rating shall be reduced at the rate of 4% for each additional 1,000ft. Expansion / contraction noises during heating up and cooling down cycles are normal and to be expected.

This appliance is not approved for closet or recessed installations. It is approved for bathroom, bedroom and bed-sitting room installations and is suitable for mobile homes. The natural gas model is suitable for installation in a mobile home that is permanently positioned on its site and fuelled with natural gas.

2.4 RATING PLATE INFORMATION

INSTALLER: It is your responsibility to check off the appropriate box on the rating plate according to the model, venting and gas type of the appliance.

For rating plate location, see "DIMENSIONS" section.

2.5 CARE OF GLASS

DO NOT CLEAN GLASS WHEN HOT! DO NOT USE ABRASIVE CLEANERS TO CLEAN GLASS.

Buff lightly with a clean dry soft cloth. Clean both sides of the glass after the first 10 hours of operation with a recommended fireplace glass cleaner. Thereafter clean as required. If the glass is not kept clean permanent discoloration and / or blemishes may result.

3.0 INSTALLATION

WARNING

RISK OF FIRE, MAINTAIN SPECIFIED AIR SPACE CLEARANCES TO VENT PIPE AND APPLIANCE.

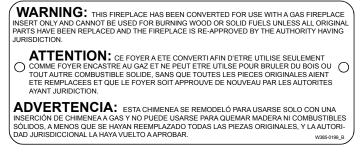

IF USING CO-AXIL VENTING WITH SPACERS, THE VENT SYSTEM MUST BE SUPPORTED EVERY 3 FEET FOR BOTH VERTICAL AND HORIZONTAL RUNS. USE SUPPORTS OR EQUIVALENT NON-COMBUSTIBLE STRAPPING TO MAINTAIN THE REQUIRED CLEARANCE FROM COMBUSTIBLES. USE WOLF STEEL LTD. SUPPORT RING ASSEMBLY W010-0370 OR EQUIVALENT NON-COMBUSTIBLE STRAPPING TO MAINTAIN THE MINIMUM CLEARANCE TO COMBUSTIBLES FOR BOTH VERTICAL AND HORIZONTAL RUNS. SPACERS ARE ATTACHED TO THE INNER PIPE AT PREDETERMINED INTERVALS TO MAINTAIN AN EVEN AIR GAP TO THE OUTER PIPE. THIS GAP IS REQUIRED FOR SAFE OPERATION. A SPACER IS REQUIRED AT THE START, MIDDLE AND END OF EACH ELBOW TO ENSURE THIS GAP IS MAINTAINED. THESE SPACERS MUST NOT BE REMOVED.

Clean out ashes from the inside of the wood-burning appliance. Make sure that the chimney and wood-burning appliance are in a clean and sound condition and constructed of non-combustible materials. If necessary have any repair work done by a qualified person before installing the insert. Remove the existing appliance damper or lock into an open position.

Using screws, attach the appliance warning tag to the inside of the firebox of the appliance into which the insert is being installed.

The sheet-metal parts of the appliance, in which the gas appliance insert is to be installed, must not be cut.

If the wood-burning factory-built appliance has

no gas access hole(s) provided, an access hole of 1½ inch or less may be drilled through the lower sides or bottom of the appliance in a proper workman like manner. This access hole must be plugged with non-combustible insulation after the gas supply line has been installed.

Ensure that existing chimney cleanouts fit properly.

The refractory, glass doors, screen rails, screen mesh and log grates may be removed from the existing appliance before installing the gas appliance insert.

Smoke shelves, shields and baffles may be removed if attached by mechanical fasteners.

The ventilation openings in the existing appliance may be obstructed by the backer plates, aluminium trim etc. but these parts are not to be applied so as to have an airtight seal.

3.1 INSERT LEVELLING

Move the insert close to its final position. This appliance is equipped with levelling screws located on the base. Level using the levelling screws. Levelling the appliance will eliminate rocking or excessive noise when the fan is in operation. Once the appliance is level, move it partially into place to allow for all connections to be made. It is not practical to level the insert once it has been installed. Determine the required depth prior to installing the unit and adjust the levelling screws accordingly.

- 67.2

- 68.4

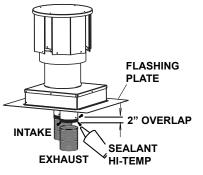

3.2 CHIMNEY CONNECTION

Chimney installation must conform to both national and local code requirements. The chimney must be lined with one 2" or 3" diameter liner for intake and one 3" diameter liner for exhaust. The minimum and maximum vent lengths are 10 and 35 feet respectively. Recommended Napoleon kits come in 3 lengths:

1-2" & 1-3" DOUBLE PLY AL	UMINUM LINER	-INLET AND EXHAUST & 2-3" TO 2" REDUCER:
	GDI-2320KT	VENT KIT 20FT
	GDI-2325KT	VENT KIT 25FT
	GDI-2335KT	VENT KIT 35FT
2-3" DOUBL	E PLY ALUMINU	IM LINER-INLET AND EXHAUST:
	GDI-320KT	VENT KIT 20FT
	GDI-325KT	VENT KIT 25 FT
	GDI-335KT	VENT KIT 35 FT
L		

While the liners must be continuous from the appliance to the chimney cap, to achieve the needed length, they may be coupled, using an approved coupler. We recommend that exhaust vents that pass through unheated spaces, such as tall exterior chimneys, be wrapped in a protective sleeve to minimize condensation and reverse flow symptoms. See Trouble Shooting for details.

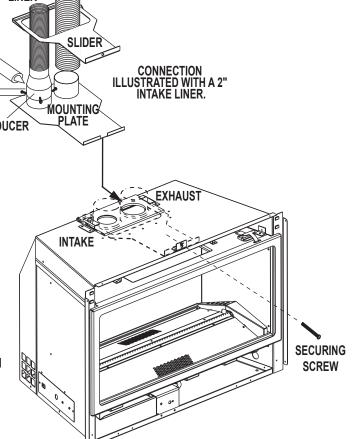

This appliance is approved for use with a 2" liner for air intake and a 3" liner for exhaust. For best performance, however, it is recommended to use two 3" liners. If a 2" liner is used for the intake, it may be necessary to adjust the primary air shutter.

3.2.1 **OUTSIDE:** Slip the one end of a liner a minimum of 2" over the sleeve of the air terminal. Secure using

3" LINER 3 screws. Then seal the joint and screw heads with high temperature LIÑER sealant. Repeat with the other liner. NOTE: We recommend that the other end of the exhaust liner be HI-TEMP SLIDEF SEALANT marked to eliminate the exhaust CONNECTION liner being connected to the 2" ILLUSTRATED WITH A 2" INTAKE LINER. intake collar at the appliance. OVERLAP MOUNTING 3.2.2 Gently stretch the liners to the PLATE REDUCER required lengths and insert into the chimney. Trim and fit the flashing plate to suit the chimney termination. Place the air terminal onto the top of the chimney. Make **EXHAUS** weather tight by sealing with caulking (not supplied). Fasten to the chimney with screws and plugs (not supplied). INTAKE 3.2.3 **INSIDE:** Remove the securing screw from the front of the vent mounting plate. Pull the vent mounting plate only, back into the track, to the

- front stop. Start the slider back into position. Re-secure the screw. The insert may now be pushed into its final position inside the wood burning appliance, and the screw tightened until the slider has been pulled tight to the front stop.
- 3.2.4 Route the flex liners through the slider. Attach and secure the liners to the vent mounting plate using the same procedure as before, ensuring that the marked exhaust liner is attached to the exhaust collar.

3.3 GAS INSTALLATION

WARNING

RISK OF FIRE, EXPLOSION OR ASPHYXIATION. ENSURE THERE ARE NO IGNITION SOURCES SUCH AS SPARKS OR OPEN FLAMES.

SUPPORT GAS CONTROL WHEN ATTACHING GAS SUPPLY PIPE TO PREVENT DAMAGING GAS LINE.

ALWAYS LIGHT THE PILOT WHETHER FOR THE FIRST TIME OR IF THE GAS SUPPLY HAS RUN OUT WITH THE GLASS DOOR OPENED OR REMOVED. PURGING OF THE GAS SUPPLY LINE SHOULD BE PERFORMED BY A QUALIFIED SERVICE TECHNICIAN. ASSURE THAT A CONTINUOUS GAS FLOW IS AT THE BURNER BEFORE CLOSING THE DOOR. ENSURE ADEQUATE VENTILATION. FOR GAS AND ELECTRICAL LOCATIONS, SEE "DIMENSION" SECTION.

ALL GAS CONNECTIONS MUST BE CONTAINED WITHIN THE APPLIANCE WHEN COMPLETE.

HIGH PRESSURE WILL DAMAGE VALVE. DISCONNECT GAS SUPPLY PIPING BEFORE TESTING GAS LINE AT TEST PRESSURES ABOVE 1/2 PSIG.

VALVE SETTINGS HAVE BEEN FACTORY SET, DO NOT CHANGE.

Installation and servicing to be done by a qualified installer. Do not use open flame.

- **3.3.1** Move the appliance into position and secure.
- **3.3.2** If equipped with a flex connector the appliance is designed to accept a 1/2" gas supply. Without the connector it is designed to accept a 3/8" gas supply. The appliance is equipped with a manual shut off valve to turn off the gas supply to the appliance.
- **3.3.3** Connect the gas supply in accordance to local codes. In the absence of local codes, install to the current CAN/CSA-B149.1 Installation Code in Canada or to the current National Fuel Gas Code, ANSI Z223.1 / NFPA 54 in the United States.
- **3.3.4** When flexing any gas line, support the gas valve so that the lines are not bent or kinked.
- **3.3.5** Check for gas leaks by brushing on a soap and water solution.

— 30.1

3.4 OPTIONAL WALL SWITCH / THERMOSTAT

For ease of accessibility, an optional remote wall switch or millivolt thermostat may be installed in a convenient location. Route 2 strand solid core millivolt wire from the gas appliance to the wall switch / millivolt thermostat. The recommended maximum lead length depends on the wire size:

WIRE SIZE	MAX. LENGTH
14 gauge	100 feet
16 gauge	60 feet
18 gauge	40 feet

Disconnect one of the wire leads to the on/off switch, then connect the wire leads from the optional thermostat / wall switch / remote. See "WIRING DIAGRAM" section.

4.0 FRAMING

MINIMUM CLEARANCE TO COMBUSTIBLES MUST BE MAINTAINED OR A SERIOUS FIRE HAZARD COULD RESULT.

NEVER OBSTRUCT THE FRONT OPENING OF THE APPLIANCE.

This insert must be recessed into a vented noncombustible wood-burning appliance (prefabricated or masonry) only. The minimum appliance opening size in which the appliance is to be installed is:

HEIGHT 21.75" WIDTH 28" DEPTH 18" The minimum allowable chimney flue size is 6" round.

The minimum distance, from the bottom of a combustible mantle projecting 3" maximum from the wall to the top of the front, is 8".

4.1 MINIMUM MANTEL CLEARANCES

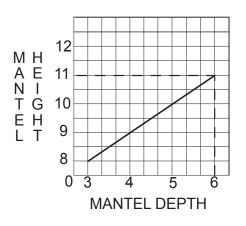

WARNING

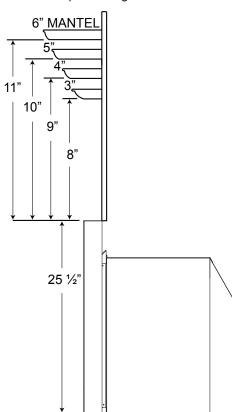

RISK OF FIRE, MAINTAIN ALL SPECIFIED AIR SPACE CLEARANCES TO COMBUSTIBLES. FAILURE TO COMPLY WITH THESE INSTRUCTIONS MAY CAUSE A FIRE OR CAUSE THE APPLIANCE TO OVERHEAT. ENSURE ALL CLEARANCES (I.E. BACK, SIDE, TOP, VENT, MANTEL, FRONT, ETC.) ARE CLEARLY MAINTAINED.

WHEN USING PAINT OR LACQUER TO FINISH THE MANTEL, THE PAINT OR LACQUER MUST BE HEAT RESISTANT TO PREVENT DISCOLOURATION.

73.1

Combustible mantel clearance can vary according to the mantel depth. Use the graph to help evaluate the clearance needed. These same requirements apply to any combustibles protruding on either side of the appliance.

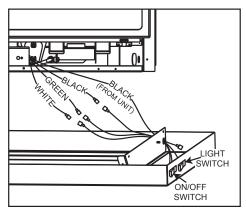

5.0 FINISHING

12

WARNING

ENSURE THE UNIT IS COMPLETELY COOL BEFORE STARTING INSTALLATION.

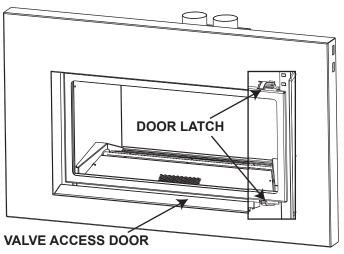

5.1 4 SIDED SURROUND

- **5.1.1** Connect the two black on/off switch wires (already connected to the frame) to the white and green wires located on the lower right hand side of the appliance control compartment.
- **5.1.2** Connect the black light switch wire (already connected to the frame) to the transformer wire (black with blue connector).
- HUYE ACCESS
- **5.1.3** Slide the black 48" wire from the control compartment through the bushing in the bottom right corner of the frame and connect it to the light switch.
- **5.1.4** Line up the holes in the back of the frame with the holes in the appliance. Secure using the screws provided.
- **5.1.5** Align the notches on the side of the valve access door with the shoulder screws, making sure it moves up and down freely.

5.2 DOOR REMOVAL AND INSTALLATION

- **5.2.1** Before servicing, allow the appliance to cool completely.
- **5.2.2** Release the top and bottom door latches, located at the right side of the door.
- **5.2.3** To access the lower door latch lift up on the front edge of the valve access door to open.

5.3 DOOR GLASS REPLACEMENT

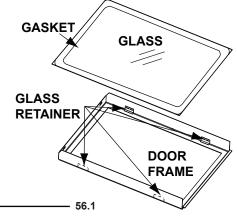

DO NOT USE SUBSTITUTE MATERIALS.

GLASS MAY BE HOT, DO NOT TOUCH GLASS UNTIL COOLED.

CARE MUST BE TAKEN WHEN REMOVING AND DISPOSING OF ANY BROKEN DOOR GLASS OR DAMAGED COMPONENTS. BE SURE TO VACUUM UP ANY BROKEN GLASS FROM INSIDE THE APPLIANCE BEFORE OPERATION.

DO NOT STRIKE, SLAM OR SCRATCH GLASS. DO NOT OPERATE APPLIANCE WITH GLASS REMOVED, CRACKED, BROKEN OR SCRATCHED.

- 5.3.1
 Place the door frame face down careful not to scratch the paint.
 Ga
- **5.3.2** Center the gasketed glass inside the door frame with the thick side of the gasket facing up.
- **5.3.3** Bend the glass retainers located along the edge of the door frame over the gasket holding the glass in place. Careful not to break the glass.

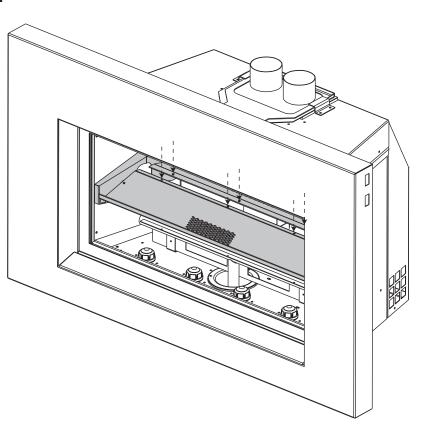

5.4 MEDIA TRAY INSTALLATION

Secure the media tray to the burner using 6 screws (W570-0001).

When removing the media tray make sure the glass media are away from the center of the screen, exposing the burner, remove screws and lift media tray out.

When replacing burner, absolutely no glass media can be in cup surrounding the orifice. <u>HINT:</u> If glass falls into cup and surrounds the orifice, insert a clean bag into a vacuum cleaner and vacuum out glass media. Replacement glass media can be ordered from Wolf Steel Ltd.

5.5 MEDIA INSTALLATION

CLEAN THE GLASS EMBERS PRIOR TO INSTALLATION. BEFORE APPLYING THE CLEANED GLASS, ENSURE THAT IT IS DRY.

DO NOT CHANGE OR SUBSTITUTE THE GLASS EMBER MATERIAL PROVIDED WITH THIS APPLIANCE. IF REPLACING, USE ONLY THE REPLACEMENT GLASS EMBERS AVAILABLE FROM YOUR AUTHORIZED DEALER / DISTRIBUTOR.

GLASS EMBERS OVER THE BURNER MUST NOT BE MORE THAN ONE LAYER HIGH. MORE THAN ONE LAYER OVER THE BURNER WILL CAUSE FLAME LIFTING AND SOOTING PROBLEMS.

Evenly spread the glass media onto the media tray, covering the burner tube and following the natural shape of the tray.

<u>NOTE:</u> The distribution of clear glass embers over the burner tube will influence the flame height. When the flames impinge on the glass, the glass may discolour slightly and the edges may soften.

CLEANING GLASS MEDIA

Glass media may have a fine oil residue that needs to be cleaned prior to installation. Clean the glass with mild dish soap, drain, rinse thoroughly and dry before placing over the burner.

- 74.1

5.6 LAMP REPLACEMENT

This appliance comes equipped with our "Night Light™". If in the event the lamp needs to be replaced, follow these instructions.

- 5.6.1 Turn off all electrical supply.
- 5.6.2 Remove the glass media and media tray from the firebox, see "MEDIA TRAY INSTALLATION" section.
- 5.6.3 Unscrew the lens cover. NOTE: Do not handle the lamp with bare fingers, protect with a clean dry cloth.
- 5.6.4 The lamp will pull straight out of the socket. Replace with Wolf Steel Ltd. parts only (W387-0009), as lamp and lens are special "high temperature" products.
- 5.6.5 Replace lens.
- 5.6.6 Replace glass media and media tray.

5.7 LAMP ASSEMBLY REPLACEMENT

THE FRONT OF THE APPLIANCE BECOMES VERY HOT DURING OPERATION. LET THE APPLIANCE COOL COMPLETELY BEFORE CONDUCTING SERVICE.

WARNING

- 5.7.1 Remove the glass media and media tray, see "MEDIA TRAY INSTALLA-TION" section.
- 5.7.2 Remove the 2 screws holding the lamp assembly shield.
- 5.7.3 Compress the 3 retainer fins and lift out the lamp assembly. Disconnect the wires.
- 5.7.4 Replace lamp assembly by aligning key hole and snap into place. Reconnect the wires.
- 5.7.5 Re-install the lamp assembly shield.
- 5.7.6 Re-install media tray and glass media.

NOTE: When removing the media tray make sure the glass media is away from the center of the screen, exposing the burner, before lifting media tray out.

When replacing burner, absolutely no glass media can be in cup surrounding the orifice. HINT: If glass falls into cup and surrounds the orifice, insert a clean

bag into a vacuum cleaner and vacuum out glass media. Replacement glass media can be ordered from Wolf Steel Ltd.

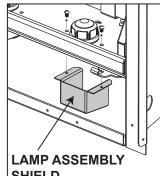

5.8 LOGO PLACEMENT

Remove the backing of the logo supplied and place on the glass viewing door, as indicated.

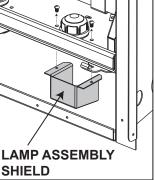

_OGC

6.0 REPLACEMENT BLOWER INSTALLATION

RISK OF FIRE AND ELECTRICAL SHOCK.

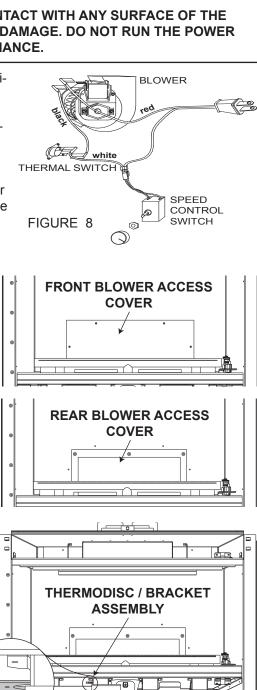

TURN OFF THE GAS AND ELECTRICAL POWER BEFORE SERVICING THIS APPLIANCE.

USE ONLY WOLF STEEL APPROVED OPTIONAL ACCESSORIES AND REPLACEMENT PARTS WITH THIS APPLIANCE. USING NON-LISTED ACCESSORIES (BLOWERS, DOORS, LOUVRES, TRIMS, GAS COMPONENTS, VENTING COMPONENTS, ETC.) COULD RESULT IN A SAFETY HAZARD AND WILL VOID THE WARRANTY AND CERTIFICATION.

ENSURE THAT THE FAN'S POWER CORD IS NOT IN CONTACT WITH ANY SURFACE OF THE APPLIANCE TO PREVENT ELECTRICAL SHOCK OR FIRE DAMAGE. DO NOT RUN THE POWER CORD BENEATH THE APPLIANCE.

- **6.0.1** Turn off the electrical power and the gas supply to the appliance insert.
- 6.0.2 Open the glass door, see "DOOR REMOVAL AND INSTAL-LATION" section. Remove the glass media and media tray, see "MEDIA TRAY INSTALLATION" section.
- **6.0.3** Remove the two side porcelain panels by removing the four screws located at the front of the appliance then remove the back porcelain panel.
- **6.0.4** Remove the front blower access cover held on with 4 screws.
- 6.0.5 Remove the rear blower access cover. <u>NOTE:</u> Check the blower gasket for damage. Replace if damaged.
- **6.0.6** Disconnect the two blower wires. Remove the blower from the mounting plate and replace. For thermal switch replacement: Remove the mounting bracket secured to the underside of the burner base. Remove the thermal switch from the bracket and replace.
- **6.0.7** Reconnect the two wires. Re-install the blower gasket. Reattach the blower mounting plate and blower access covers. Replace the glass media. Close the glass door.
- **6.0.8** Turn the gas supply and electricity back on. Because the blower is thermally activated, when turned on, it will automatically start approximately 5-15 minutes after lighting the appliance insert and will run for approximately 30-45 minutes after the appliance insert has been turned off. Use of the fan increases the output of heat.

Drywall dust will penetrate into the blower bearings causing irreparable damage and must be prevented from coming into contact with the blower or its compartment. Any damage resulting from this condition is not covered by the warranty policy.

7.0 OPERATION

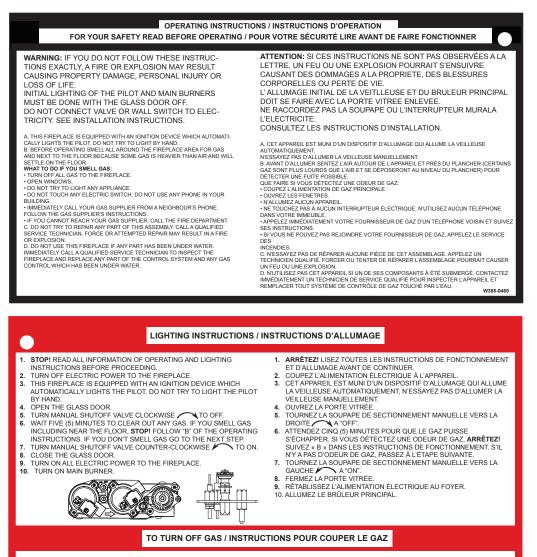

IF YOU DO NOT FOLLOW THESE INSTRUCTIONS EXACTLY, A FIRE OR EXPLOSION MAY RESULT CAUSING PROPERTY DAMAGE, PERSONAL INJURY OR LOSS OF LIFE.

ALWAYS LIGHT THE PILOT WHETHER FOR THE FIRST TIME OR IF THE GAS SUPPLY HAS RUN OUT WITH THE GLASS DOOR OPENED OR REMOVED.

The on-off switch is located on the front of the appliance in the top right corner.

When lit for the first time, the appliance will emit a slight odour for a few hours. This is a normal temporary condition caused by the "burn-in" of internal paints and lubricants used in the manufacturing process and will not occur again. Simply open a window to sufficiently ventilate the room. After extended periods of non-operation such as following a vacation or a warm weather season, the appliance may emit a slight odour for a few hours. This is caused by dust particles in the heat exchanger burning off. Open a window to sufficiently ventilate the room.

7.1 OPERATING AND LIGHTING INSTRUCTIONS

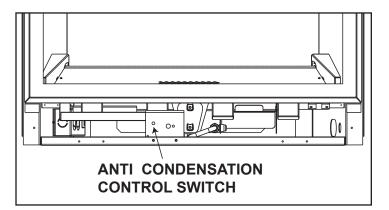

1. TURN OFF ALL ELECTRICAL POWER TO THE FIREPLACE IF SERVICE IS TO BE PERFORMED.

- 2. TURN MANUAL SHUTOFF VALVE CLOCKWISE TO OFF. DO NOT FORCE.
- 1. COUPEZ L'ALIMENTATION ÉLECTRIQUE AU FOYER SI UN TRAVAIL D'ENTRETIEN DOIT SE FAIRE.
- L'INNET LA SOUPAPE D'ARRÉT MANUELLE VERS LA DROITE
 À "OFF" NE FORCEZ PAS.

7.2 ANTI CONDENSATION SWITCH

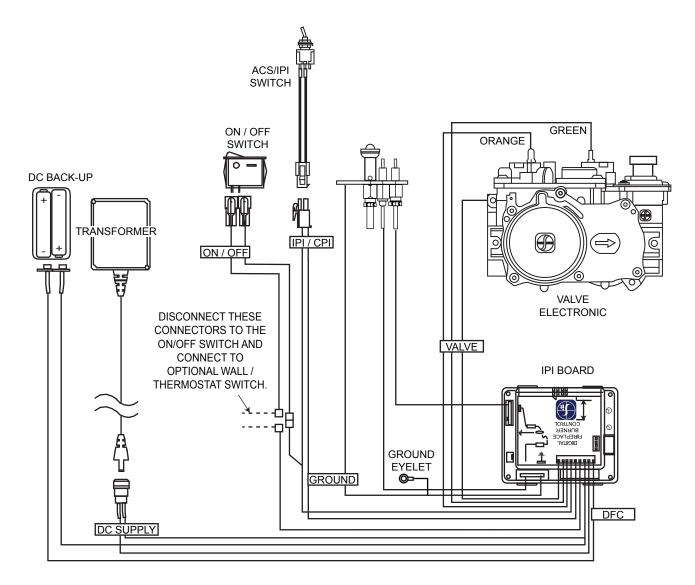

This appliance has the option to go from an electronic intermittent pilot ignition (IPI) to a standing pilot for cold climates. The anti condensation control switch (standing pilot) is located on the left of the control panel. Using your finger, flip the switch up for standing pilot, or down for intermittent pilot ignition.

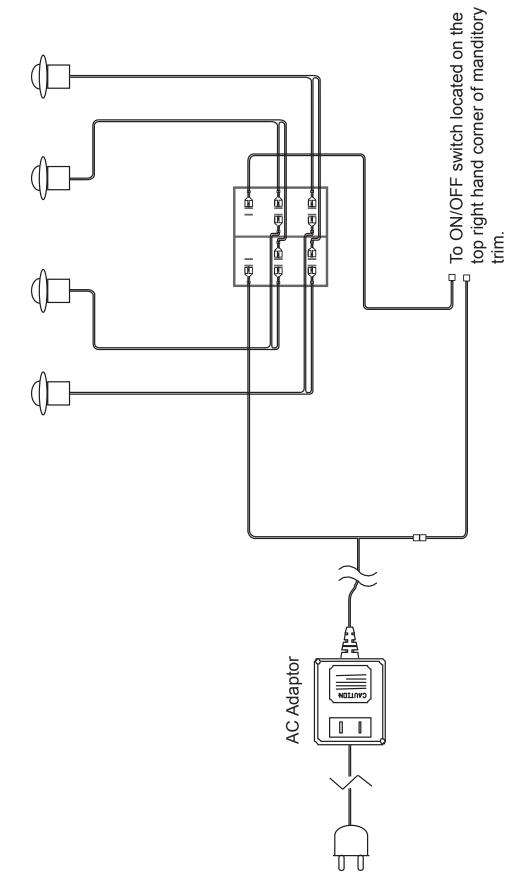

8.0 WIRING DIAGRAM

This appliance comes equipped with a battery back-up. Connect the battery holder to the wire harness before using the appliance. Place near the IPI board. (Batteries not included).

<u>NOTE:</u> If battery backup is used, it must be connected to a 6 volt battery pack.

8.1 NIGHT LIGHT[™] WIRING DIAGRAM

9.0 ADJUSTMENTS

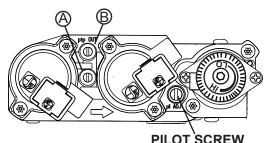

20

9.1 PILOT BURNER ADJUSTMENT

Adjust the pilot screw to provide properly sized flame. Turn in a clockwise direction to reduce the gas flow.

Check Pressure Readings:

Inlet pressure can be checked by turning screw (A) counterclockwise 2 or 3 turns and then placing pressure gauge tubing over the test point. Gauge should read 7" (minimum 4.5") water column for natural gas or 13" (11" minimum) water column for propane. Check that main burner is operating on "HI".

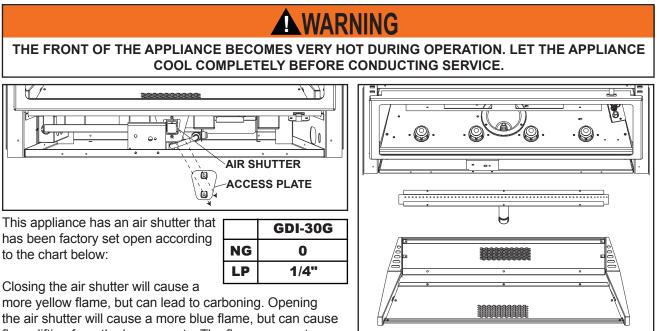

39.4

Outlet pressure can be checked the same as above using screw (B). Gauge should read 3.5" water column for natural gas or 10" water column for propane. Check that main burner is operating on "HI".

AFTER TAKING PRESSURE READINGS, BE SURE TO TURN SCREWS CLOCKWISE FIRMLY TO RESEAL. DO NOT OVERTORQUE.

Leak test with a soap and water solution.

9.2 VENTURI ADJUSTMENT

flame lifting from the burner ports. The flame may not ap-

pear yellow immediately; allow 15 to 30 minutes for the final flame color to be established.

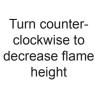

AIR SHUTTER ADJUSTMENT MUST ONLY BE DONE BY A QUALIFIED INSTALLER!

Access plate and gasket must be re-installed after adjustment.

The alternate access is to remove the glass media, media tray and burner from the appliance and then adjust the air shutter. <u>NOTE:</u> When removing the media tray make sure the glass media are away from the center of the screen, exposing the burner, before lifting media tray out.

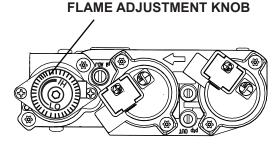

When replacing burner, absolutely no glass can be in cup surrounding the orifice. **<u>HINT</u>**. If glass falls into cup and surrounds the orifice, insert a clean bag into a vacuum cleaner and vacuum out glass media. Replacement glass media can be ordered from Wolf Steel Ltd.

9.3 FLAME ADJUSTMENT

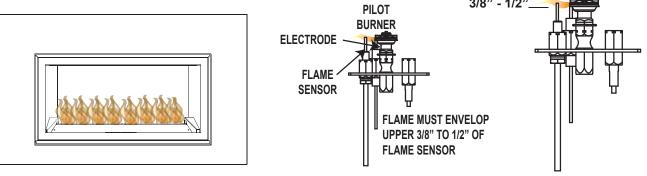

Turn clockwise to increase flame height

- 54.1

9.4 FLAME CHARACTERISTICS

It's important to periodically perform a visual check of the pilot and burner flames. Compare them to the illustrations provided. If any flames appear abnormal call a service person.

10.0 MAINTENANCE

TURN OFF THE GAS AND ELECTRICAL POWER BEFORE SERVICING THE APPLIANCE.

APPLIANCE MAY BE HOT, DO NOT SERVICE UNTIL APPLIANCE HAS COOLED.

DO NOT USE ABRASIVE CLEANERS.

CAUTION: Label all wires prior to disconnection when servicing controls. Wiring errors can cause improper and dangerous operation. Verify proper operation after servicing. This appliance and its venting system should be inspected before use and at least annually by a qualified service person. The appliance area must be kept clear and free of combustible materials, gasoline or other flammable vapors and liquids. The flow of combustion and ventilation air must not be obstructed.

- 1. In order to properly clean the burner and pilot assembly, remove the logs, rocks and/or glass to expose both assemblies.
- 2. Keep the control compartment, media, burner, air shutter opening and the area surrounding the logs clean by vacuuming or brushing, at least once a year.
- **3.** Check to see that all burner ports are burning. Clean out any of the ports which may not be burning or are not burning properly.
- 4. Check to see that the pilot flame is large enough to engulf the flame sensor and/or thermocouple / thermopile as well as reaches the burner.
- **5.** Replace the cleaned logs, rocks or glass. Failure to properly position the media may cause carboning which can be distributed in the surrounding living area.
- 6. Check to see that the main burner ignites completely on all openings when turned on. A 5 to 10 second total light-up period is satisfactory. If ignition takes longer, consult your local authorized dealer / distributor.
- **7.** Check that the gasketing on the sides, top and bottom of the door is not broken or missing. Replace if necessary.
- If for any reason the vent air intake system is disassembled, re-install and re-seal per the instructions provided for the initial installation.

11.0 REPLACEMENTS

Contact your dealer or the factory for questions concerning prices and policies on replacement parts. Normally all parts can be ordered through your Authorized dealer / distributor.

FOR WARRANTY REPLACEMENT PARTS, A PHOTOCOPY OF THE ORIGINAL INVOICE WILL BE REQUIRED TO HONOUR THE CLAIM.

When ordering replacement parts always give the following information:

- Model & Serial Number of appliance
- Installation date of appliance
- Part number
- Description of part
- Finish

22

* IDENTIFIES ITEMS WHICH ARE NOT ILLUSTRATED. FOR FURTHER INFORMATION, CONTACT YOUR AUTHORIZED DEALER. FAILURE TO POSITION THE PARTS IN ACCORDANCE WITH THIS MANUAL OR FAILURE TO USE ONLY PARTS SPECIFICALLY APPROVED WITH THIS APPLIANCE MAY RESULT IN PROPERTY DAMAGE OR

PERSONAL INJURY.

12.0 TROUBLE SHOOTING

ALWAYS LIGHT THE PILOT WHETHER FOR THE FIRST TIME OR IF THE GAS SUPPLY HAS RAN OUT, WITH THE GLASS DOOR OPEN OR REMOVED.

TURN OFF THE GAS AND ELECTRICAL POWER BEFORE SERVICING THE APPLIANCE.

APPLIANCE MAY BE HOT, DO NOT SERVICE UNTIL APPLIANCE HAS COOLED.

DO NOT USE ABRASIVE CLEANERS. **SYMPTOM** PROBLEM **TEST SOLUTION** Wiring. Verify the wire for the sensor and the wire for the Pilot will not light. ignitor are connected to the correct terminals (not reversed) on the module. NOTE: Sensor has 3/16" Makes noise with connection and ignitor has 1/8" connection. no spark at pilot burner. Loose connection. Verify no loose connections, electrical shorts in the wiring or ground out to any metal object. IGNITOR Module. _ Turn the ON/OFF switch to the "OFF" position. SENSO Remove the igniter wire from the module. Place the ON/OFF switch to the "ON" position. Hold a grounded wire about 3/16" away from the ignitor (spark) terminal on the module. If no spark the ignitor terminal module must be replaced. If there is a spark the ignitor terminal is fine. Inspect pilot PILOT TUBE assembly for a shorted wire or cracked insulator around the electrode. Igniter Spark gap is Spark gap of the ignitor to the pilot should be 1/8". _ incorrect. Transformer. Verify the transformer is installed and plugged into the module. Check voltage of the transformer under load at the spade connections on the module with the ON/OFF switch in the "ON" position. Acceptable readings of a good transformer are between 6.2 and 7.0 volts A.C. Battery backup Check batteries. A shorted or loose Remove and reinstall the wiring harness that plugs into the module. Remove and verify continuity of Connection. each wire in wiring harness. Improper switch wiring. Troubleshoot the system with the simplest ON/OFF switch. Module is not grounded. Verify the value and pilot assemblies are properly grounded to the metal chassis of the appliance or log set. Pilot sparks but Verify that the incoming gas line ball valve is Gas supply. _ will not light. "Open". Verify that the inlet pressure reading is within acceptable limits, inlet pressures must not exceed 14" W.C. Fill the tank. Out of propane gas. 42.7

SYMPTOM	PROBLEM		TEST SOLUTION
Carbon is being deposited on	Air shutter has become blocked.	-	Ensure air shutter opening is free of lint or other obstructions.
glass, logs, rocks, media or combustion chamber surfaces.	Flame is impinging on the glass, logs, rocks, media or combustion chamber.		Check that the glass, logs, rocks or media are correctly positioned. Open air shutter to increase the primary air. Check the input rate: check the manifold pressure and orifice size as specified by the rating plate values. Check that the door gasketing is not broken or missing and that the seal is tight. Check that both vent liners are free of holes and well sealed at all joints. Check that minimum rise per foot has been adhered to for any horizontal venting.
Continues to spark and pilot lights, but main	Short or loose connection in sensor rod.	-	Verify all connections. Verify the connections from the pilot assembly are tight; also verify these connections are not grounding out to any metal.
burner will not light.	Poor flame rectification or contaminated sensor rod.	-	Verify the flame is engulfing the sensor rod. This will increase the flame rectification. Verify correct pilot orifice is installed and inlet gas specifications to manual. (Remember, the flame carries the rectification current, not the gas. If the flame lifts from pilot hood, the circuit is broken. A wrong orifice or too high of an inlet pressure can cause the pilot flame to lift.) The sensor rod may need cleaning.
	Poor grounding between pilot assembly and gas valve.	-	Verify that the wire harness is firmly connected to module Verify that the ceramic insulator around the sensor rod is not cracked, damaged, or loose. Verify the connection from the sensor rod to the sensor wire.
	Damaged pilot or dirty sensor rod.	-	Clean sensor rod with an emery cloth to remove any contamination that may have accumulated on the sensor rod. Verify continuity with multimeter with ohms set at the lowest range.
Pilot lights Stops sparking	Wiring / Connection.	-	Inspect all wires, ensure good tight connections. Verify that all wiring is installed exactly as specified.
/ pilot remains lit but burner will not turn on.	Wiring harness.	-	Inspect the wiring harness, and verify the harness is tightly connected to the module. Verify that all wires are connected in the right order. See "WIRING DIAGRAM" section.
Exhaust fumes smelled in room, headaches.	Appliance is spilling.	-	Check all seals. Check if exhaust is re-entering through an open door or window. 42.7_2

- 42.7_2

SYMPTOM	PROBLEM	TEST SOLUTION
White / grey film forms.	Sulphur from fuel is being deposited on glass, logs or combustion chamber surfaces.	 Clean the glass with a recommended gas appliance glass cleaner. DO NOT CLEAN GLASS WHEN HOT. If deposits are not cleaned off regularly, the glass may become permanently marked.
Flames are very	Door is ajar.	- Tighten door clamps.
aggressive.	Venting action is too great.	 Restrict vent exit with restrictor plate. See "RESTRICTING VENTS" section.
Main burner flame is a blue, lazy, transparent	Blockage in vent.	 Remove blockage. In really cold conditions, ice buildup may occur on the terminal and should be removed.
flame.	Compromised venting.	- Check venting system parameters (seal, length, rise, etc.).
	GLASS EMBERS ONLY: Too many glass embers.	 Re-distribute glass embers so that only a single layer is over top of the burner tube.
Main burner goes out: pilot goes out.	Vent recirculation.	- Check joint seals and installation.

13.0 WARRANTY

NAPOLEON® products are manufactured under the strict Standard of the world recognized ISO 9001 : 2008 Quality Assurance Certificate.

NAPOLEON® products are designed with superior components and materials assembled by trained craftsmen who take great pride in their work. The burner and valve assembly are leak and test-fired at a quality test station. The complete heater is again thoroughly inspected by a qualified technician before packaging to ensure that you, the customer, receives the quality product that you expect from NAPOLEON®.

NAPOLEON® GAS FIREPLACE PRESIDENT'S LIFETIME LIMITED WARRANTY

The following materials and workmanship in your new NAPOLEON® gas heater are warranted against defects for as long as you own the heater. This covers: combustion chamber, heat exchanger, stainless steel burner, phazer[™] logs and embers, rocks, ceramic glass (thermal breakage only), gold plated parts against tarnishing, porcelainized enameled components and aluminum extrusion trims.*

Electrical (110V and millivolt) components and wearable parts such as blowers, gas valves, thermal switch, switches, wiring, remote controls, ignitor, gasketing, and pilot assembly are covered and NAPOLEON® will provide replacement parts free of charge during the first year of the limited warranty.*

Labour related to warranty repair is covered free of charge during the first year. Repair work, however, requires the prior approval of an authorized company official. Labour costs to the account of NAPOLEON® are based on a predetermined rate schedule and any repair work must be done through an authorized NAPOLEON® dealer.

⁴ Construction of models vary. Warranty applies only to components included with your specific heater.

CONDITIONS AND LIMITATIONS

NAPOLEON® warrants its products against manufacturing defects to the original purchaser only. Registering your warranty is not necessary. Simply provide your proof of purchase along with the model and serial number to make a warranty claim. NAPOLEON® reserves the right to have its representative inspect any product or part thereof prior to honouring any warranty claim. Provided that the purchase was made through an authorized NAPOLEON® dealer your heater is subject to the following conditions and limitations: This factory warranty is non-transferable and may not be extended whatsoever by any of our representatives.

The gas heater must be installed by a licensed, authorized service technician or contractor. Installation must be done in accordance with the installation instructions included with the product and all local and national building and fire codes. This limited warranty does not cover damages caused by misuse, lack of maintenance, accident, alterations, abuse or neglect and parts installed from other manufacturers will nullify this warranty.

This limited warranty further does not cover any scratches, dents, corrosion or discoloring caused by excessive heat, abrasive and chemical cleaners nor chipping on porcelain enamel parts, mechanical breakage of PHAZER™ logs and embers.

NAPOLEON® warrants its stainless steel burners against defects in workmanship and material for life, subject to the following conditions: During the first 10 years NAPOLEON® will replace or repair the defective parts at our option free of charge. From 10 years to life, NAPOLEON® will provide replacement burners at 50% of the current retail price.

In the first year only, this warranty extends to the repair or replacement of warranted parts which are defective in material or workmanship provided that the product has been operated in accordance with the operation instructions and under normal conditions. After the first year, with respect to this President's Lifetime Limited Warranty, NAPOLEON® may, at its discretion, fully discharge all obligations with respect to this warranty by refunding to the original warranted purchaser the wholesale price of any warranted but defective part(s).

NAPOLEON® will not be responsible for installation, labour or any other expenses related to the reinstallation of a warranted part and such expenses are not covered by this warranty.

Notwithstanding any provisions contained in the President's Lifetime Limited Warranty, NAPOLEON'S responsibility under this warranty is defined as above and it shall not in any event extend to any incidental, consequential or indirect damages.

This warranty defines the obligations and liability of NAPOLEON® with respect to the NAPOLEON® gas heater and any other warranties expressed or implied with respect to this product, its components or accessories are excluded.

NAPOLEON® neither assumes, nor authorizes any third party to assume, on its behalf, any other liabilities with respect to the sale of this product.

NAPOLEON® will not be responsible for: over-firing, downdrafts, spillage caused by environmental conditions such as rooftops, buildings, nearby trees, hills, mountains, inadequate vents or ventilation, excessive venting configurations, insufficient makeup air, or negative air pressures which may or may not be caused by mechanical systems such as exhaust fans, furnaces, clothes dryers, etc. Any damages to heater, combustion chamber, heat exchanger, brass trim or other components due to water, weather damage, long periods of dampness, condensation, damaging chemicals or cleaners will not be the responsibility of NAPOLEON®.

ALL SPECIFICATIONS AND DESIGNS ARE SUBJECT TO CHANGE WITHOUT PRIOR NOTICE DUE TO ON-GOING PRODUCT IMPROVEMENTS. NAPOLEON® IS A REGISTERED TRADEMARK OF WOLF STEEL LTD. PATENTS U.S. 5.303.693.801 - CAN. 2.073.411, 2.082.915. © WOLF STEEL LTD.
