

New & Improved

## Universal Gas Fireplace Remote Controls

**Available Now.**  
Place your order today!

We're pleased to announce the introduction of two new improved hand-held remote controls. The F60 thermostatic remote will replace the original F50 and the F45 will replace the first generation of F40's. Both models are available as a single unit (F60 and F45) or as a more economical package of 6 (F60-6 and F45-6). Skytech model F52 thermostatic remote will no longer be substituted for the original F50 but is still available as a single unit only, see below for pricing.

### Suggested List Price

Product Codes	Sugg. List Price
F45	\$89.00
F45-6	\$474.00
F60	\$139.00
F60-6	\$774.00
F52	\$169.00

### NEW packaging, NEW look, NEW Advanced Technology, NEW “No-Hassle” Customer Care Procedure

- Re-designed battery compartment latch combined with life cycle testing and stringent quality control process ensures 20,000 trouble free operations
- Signal adjustment screw will increase or decrease signal strength from preset 15 meters (16 yards) depending on the application
- Flame icon will only appear when the transmitter is sending the on signal – increasing battery life
- 2° temperature swing reduces unwanted short on/off cycling (if the set temperature is 70 °F, the fireplace will turn on at 69 °F and off at 71 °F.
- In thermostat mode, the transmitter will monitor the room temperature every 60 seconds and react as required
- Every 15 minutes the transmitter will re-send a signal to verify the demand for heat to ensure the unit is still operating if the temperature has not yet reached the set point
- In the thermostat mode, the fireplace will automatically shut down if no signal is received in a 12 hour period (transmitter inadvertently left in another room or batteries need replacement)
- Screen light stays on for only four seconds after adjustment instead of the original seven second period - increasing battery life
- New packaging for the F45/F60 remotes (shown above)
- QC label now identifies date code
- NO HASSLE CUSTOMER CARE PROCEDURE – Consumers DO NOT call you with questions! Customer care email address is inside the transmitter battery compartment and our factory ‘Customer Care’ phone number and e-mail address are in the instruction leaflet
